Whole Number 420

Wheat Pool Meeting in Stony

Several good addresses were made at Saturday evening's Wheat Pool meeting in Stony Plain. Mr Washburn was the first speaker up, and gave a very interesting outline of the workings of the first wheat pool, and how its chief function seemed to be to keep the price of wheat down. He next touched on the formation of the present Pool, and stated that the first contribution to it was the donation to the province of Alberta from the Federal government of some \$112,000, which was computed to be this province's share of the surplus from the original war-time wheat pool. He made an earnest plea to all wheat growers to join the Pool, and explained the many advantages which would accrue to them by so doing.

At the conclusion of this address, Mr Louie Goebel, who is an old-time member of the Pool, showed where, what non-Pool members

claim to be a disadvantage, is in reality a big advantage. Louie instanced the fact that a Pool member when selling his wheat in the Fall to the Pool receives at that time 75 per cent of the value; and in the spring, when he needs money for oil, gas and repairs for his machinery, he gets a cash payment from the Pool; and the third and final payment came just in time to pay cash for his twine and other harvest requirements.

Mr Love, secretary of Alberta Dairy Pool, next addressed the meeting, and his remarks were given very close attention. He stated that the Dairy Pool was planned along the same lines as the Wheat Pool, and that the directors followed along on exactly the same principle. He produced a large chart, showing the amount of wheat produced in the three prairie provinces during the last ten years. The average price received therefor, and the return per acre this gave. The high average was \$3 per acre, and the low he placed at 98¢. He next touched on dairy products, and showed where the price of wheat was low the volume of other prod-

LOCAL NEWS.

A reception was given at the home of Mr and Mrs L. Wight, on Tuesday evening, to the young people of town and district.

At the Sunday evening service at the United Church, Rev G. W. Slater delivered a fine discourse, taken as his text the parable of the Good Samaritan.

Rudolf Lutz was arrested in the local pool room Saturday evening, on a warrant charging him with "uttering forged documents." He was taken to Edmonton.

For being in an intoxicated condition on Main St., Emil Ploutz was arrested on Monday and fined \$20 and costs.

At the local Court Tuesday the railway section boss at Spruce Grove appeared, to answer to a charge laid under the Noxious Weeds Act. He was given a nominal fine, as also was Mike Benenasky of Carvel district, who was up on a similar charge.

A baby clinic to be held in Stony Plain Monday, Aug. 27, in town hall, 10 a.m. to 4 p.m. Mothers are invited to come and bring their babies and children up to 6 years of age. Free health examination, weighed and measured. "To Keep Well Children Well." Dept. Public Health, Nursing Branch.

Inga Councillors Meet.

Inga Councillors had an all day session on Friday last. The pay sheets from the different divisions for road work done, were presented, and ordered paid if found correct.

Agents were present from the road machinery companies, the Richardson, Russell and the Adams, and addressed the councillors on the superior quality of their goods. The councillors appeared to be under the impression that it was rather late in the season to purchase this class of machinery, and the agents withdrew.

Mr Spence, deputy minister of the Dept. of Municipalities, paid the councillors a visit, and evinced quite an interest in the proceedings. He inquired into certain matters which had transpired some time ago. He appeared satisfied with the explanation given, and complimented the Reeve and councillors on the businesslike way they conducted their affairs.

Notes of the farm increased, and vice versa. For the last few years the volume of dairy products had decreased very rapidly. The speaker predicted that in the event of the price of wheat being lowered in the near future thru over production, that the volume of dairy products in Western Canada would again raise to the high peak which obtained a few years ago.

FOR SALE, American Abel Steam Tractor 25 H.P., 125 lbs pressure; has tender, 2 water tanks, hose and tank wagon; and J.I. WITH the superb ease of a thoroughbred that takes all in its stride, the "Bigger and Better" Chevrolet never falters in the most trying circumstances—proves its mettle on the steepest grades and in the face of the greatest obstacles.

The ruggedness of Chevrolet construction alone makes these things possible. There is no part of the engine—the chassis—of the body that was not designed primarily for rugged endurance—put to the test again and again on the General Motors Proving Ground.

As a result the "Bigger and Better" Chevrolet sturdily climbs without a halt, the steep slopes of the Rockies, and ploughs its way through the deep mud and quagmire of half-made prairie trails. In whatever conditions it may be placed, the splendid ruggedness of Chevrolet remains loyal in the service of its owner.

Its long life has become proverbial—the very name Chevrolet is a synonym for strength that endures.

The "Bigger and Better" Chevrolet—beautiful in form—functional in appointments—superbly rugged in construction—powered by the famous Valve-in-head engine—offers solid, enduring, trustworthy performance even under adverse conditions.

No matter what the roads—no matter what the weather—at all times the "Bigger and Better" Chevrolet stays on the job.

The G.M.A.C. General Motors' own deferred payment plan affords the most convenient and economical way of buying your Chevrolet on time.

An Important Experiment

Bringing ten thousand of the vast army of unemployed British miners to assist in harvesting Western Canada's 1928 grain crops is an experiment on a large scale that will be watched with great interest and sympathy not only in Canada and Britain, but throughout the Empire. That it is an experiment confronted by many difficulties and not free from dangers is fully recognized, but in view of Canada's present need for harvest hands, and Britain's serious and apparently unsolvable problem of unemployment, it is one well worth while.

Unquestionably there has arisen a feeling in the Old Land that Canada, with its sparse population and great areas of vacant lands and enormous undeveloped natural resources, ought to come to the relief of Britain and the British people through the acceptance of large numbers of the unemployed, and that in doing so this Dominion would not only render a real service to these workers and the Empire but would ultimately be well repaid through the infusion of so much British blood into the cosmopolitan citizenship of this country.

In Canada itself there are men more or less prominent in the life of the country who are critical of the immigration now coming into the Dominion and who loudly demand that settlers from the British Isles be given a preference over all others, even to the extent of excluding those of other than British birth.

Opposed to these groups is a large body of Canadian opinion which holds that it would be a mistake not only for Canada but for Britain to bring into this Dominion large numbers of the British unemployed who lack the fitness and qualifications which would enable them to make successful citizens in this newer land. As the Minister of Labor recently pointed out, it would be no kindness to bring unemployed men from Britain unless there is employment for them here, and that no good service would be rendered the Empire by lessening the number of unemployed in Britain and creating an acute unemployment situation in Canada.

It is recognized, too, that in Canada employment is subject to seasonal changes, and that even under the most favorable and prosperous conditions a measure of unemployment is inevitable during the winter months. Winter employment is at low ebb in the cities and larger towns during the winter, and unless winter employment on the farms can be secured for them, British immigrants might fare badly, through no fault of their own, or the fault of anybody else. Between April and November, the situation is entirely different with farm work, railway construction, building operations and municipal improvements and works of all kinds under way. December to March is the critical period.

Under the arrangement whereby these ten thousand unemployed British miners are coming to work in the harvest fields, it is provided that the Canadian authorities will do everything in their power to secure winter farm employment for them, but that all those who cannot be so placed, or prefer to return to Britain, must be returned.

For the sake of these men first and foremost, and for the sake of Canada and Britain secondly, it is to be hoped that by far the greater number will be placed in all-the-year round employment. Canada wants these Britishers, and they should be accorded a hearty welcome and every possible chance to make good. In any movement of population there is bound to be a number of misfits, chronic grouse and hopeless incompetents, but the experiment being made should not be judged by these exceptions, but by the measure of success attending the movement as a whole.

Harvest time in the West is a time of stress. It is a strenuous period, when everybody is obliged to work long hours. It is a time when the farmer, anxious to secure in safety the results of a year's labor, is apt to be impatient and exacting, and to these miners unused to long hours and engaged in unfamiliar work, the farmer may appear to be a hard taskmaster. There must be a recognition of these differences and difficulties on both sides. The harvest hand should strive to realize to the full his own inexperience and shortcomings in his new environment and exert himself to the utmost to give satisfaction and make good. The farmer employer, on the other hand, should exercise a maximum of patience and endeavor to teach these men and bring out the best in them in the hope and expectation of encouraging them to do their best and inducing in them a real liking for Canada and a determination to remain and make a success of life in this country.

These British miners. If, as a harvest hand, they have a man seeking to do Farmers, too, should co-operate to the fullest extent possible with the Dominion and Provincial Governments in finding winter employment for his best and make good, arrangements should, if possible be made to retain best and make good, arrangements should, if possible be made to retain him throughout the winter and until work becomes plentiful in the spring of the new year.

Judicially handled, and with everybody striving to do his best, this experiment with British miners may well prove to be a turning point in the history of immigration to Canada. The British Government is now training an additional 21,000 miners and their families for agricultural life in the Dominions. If the coming ten thousand harvesters make a success of their undertaking—and if the Canadian people unitedly help them to do so—this country will undoubtedly receive the bulk of these other 21,000 partially trained men and women. Canada wants them, and our people should do everything in reason to encourage them to come here.

The present movement presents a golden opportunity, therefore, to those who have been outspoken in their criticism of past immigration efforts from Britain. It is now up to them to throw themselves with equal vigor into the task of finding permanent work for the thousands who are now or shortly will be in our midst.

Blistered Feet.

Grain Stocks Larger

The Dominion Bureau of Statistics reports the following as the stocks of grain in Canada at the close of the crop year ended July 31, 1928, as compared with the same date last year within brackets. The quantities are expressed in imperial bushels. Wheat, 78,484,052 (50,765,435); Oats, 28,715,183 (23,045,448); Barley, (1,283,777); Seed, 1,396,347 (2,056,106.)

The wrongs of other people are continually getting mixed up with our rights.

Big Land Deal

Ten Thousand Acres Of Farming Land Purchased In Wainwright District

What is stated to be the largest land deal ever consummated in Northern Alberta was completed here when the Mid-West Development and Finance Corporation purchased 10,000 acres of choice farming land in the Wainwright District at a price of \$200,000. There are 3,000 acres under cultivation and the land is laid out in twenty units which are being rented by progressive farmers.

ST. VITUS DANCE

A Trouble That Usually Attacks Young Children

St. Vitus Dance is the name generally given to a disease described by medical men as chorea. This trouble usually attacks young children, though older people may be afflicted with it. The most common symptoms are a twitching of the face and limbs. As the disease progresses the twitching takes the form of spasms, in which the jerking motion may be continued for hours or all the limbs may be affected. Frequently the patient is unable to hold anything in the hand or walk steadily. In severe cases the speech is often affected. The disease is due to a debility of the brain which comes through an enriched blood supply. Dr. Williams' Pink Pills have been most successful in treating this trouble through their specific action on the blood, which it enriches and purifies. The following instance proves the value of Dr. Williams' Pink Pills in this trouble. Mrs. Thomas Brown, of Bath, says: "Dr. Williams' Pink Pills have been in use in my family for years and always with the most satisfactory results. I have seen this trouble in the life of my only son. At ten years of age he grew very nervous and the trouble developed into St. Vitus Dance. His legs and arms would jerk and twitch, then his speech was affected, and his condition was pitiable. Just then there came to me a little book telling of Dr. Williams' Pink Pills and I decided to give them to him. By the time two boxes were used there was an improvement in his condition and by the time six boxes more were taken all traces of the trouble had disappeared, and he was well and strong. I have also given the pills to my growing girls, and I know of no better strengthening medicine. I may add that the same applies to grown-ups as well."

You can get these pills through any medicine dealer or by mail at 30 cents a box from Dr. Williams' Medicine Co., Brockville, Ont.

Travelling Clinic

Government Clinic Pays Visit To Peace River District

A Government travelling clinic has been operating in the Peace River District this season. At five population centres a total of 314 children were examined in 10 days. A total of 124 minor operations were performed. 279 children given dental examinations, 144 extractions performed, and other dental treatment given to 128 children.

Miller's Worm Powders were devised to promptly relieve children who suffer from the ravages of worms. It is a simple preparation to destroy intestinal worms without shock or injury to the most sensitive system. They act thoroughly and painlessly, and though in some cases they may cause vomiting, that is an indication of their powerful action and not of any nauseating property.

Gasoline Tax Revenue

In the first two months, May and June, in which the three-cent gasoline tax was in force in Saskatchewan, \$325,000 was collected, it was officially announced. When the gasoline tax act was passed at the last session of the Legislature, it was estimated that the revenue to the province would be, for the full year, \$700,000.

Stop the Cough. — Coughing is caused by irritation in the respiratory passages and is the effort to dislodge obstructions that come from inflammation of the mucous membrane. Treatment with Dr. Thomas' Electric Oil will allay the inflammation and consequently the cough will usually stop. Try it and you will be satisfied.

Platinum In Canada

Canada is the third largest producer of platinum among the countries of the world, Russia and Colombia, South America, holding third and second place respectively. Last year Canada produced 11,228 fine ounces of platinum valued at \$717,613.

Laying Heavy Steel Rails

C.P.R. Replacing Rails With Heavier Steel On Maple Creek and Brooks Subdivisions

Good progress is being made with the relaying of steel on the Canadian Pacific lines in the Calgary division during the past few months. One hundred and thirty-five miles of new rail has been laid on the Maple Creek subdivision, that is between Medicine Hat and Swift Current, while the relaying is now going on in the Brooks subdivision, between Calgary and Medicine Hat.

The relaying consists of the replacement of 80 and 85 pound steel by rails weighing 100 pounds per foot. The heavier rail is necessary in view of the increased speed of the trains and their greater weight.

As mentioned above, 135 miles of heavy rail have been laid on the Maple Creek subdivision. On the Brooks subdivision the relaying of heavy steel will be about 130. It is estimated that the cost of relaying the track is approximately \$1,000,000 per hundred miles, thus the work on the Calgary division this year will cost the Canadian Pacific Railway a total of about \$2,065,000.

Water Power Installation

Two Million Horsepower To Be Added Within Next Few Years

Two million horsepower will, it is estimated by the department of the interior, be added to the power potential in the Dominion within the next few years. This new work will require a direct investment of at least \$200,000,000.

The annual statement of the Hon. Charles Stewart, minister of the interior, with regard to the progress of water power development issued at the beginning of the year predicted an addition of 378,000 horsepower to the total installation in the Dominion during the first six or seven months of 1928. A mid-season review of conditions now indicates that during the whole year as much as 550,000 H.P. will be added, either in new development or in addition to existing stations.

Appleford Paper Products

HAMILTON, CANADA

Says No Nation On Earth Whose Position Is More Secure Than That Of This Dominion

"What we want, and what we must get, is that hearty satisfaction in co-operative work, a pride in our own possessions, and a comfort in our own allegiance those are the bonds that are going to keep the Empire United, not only for a day and generation, but for generation after generation. The British Empire stands above everything else in the world for freedom, openness, and freedom that is not merely political freedom."

With these words, Rt. Hon. Ramsay MacDonald, leader of the British Labor Party, and former Prime Minister of Great Britain, summed up a declaration of faith in the permanence of the ties of Empire, when addressing the Canadian Club at Montreal. Mr. MacDonald expressed confidence in Canada's future and asserted that the spirit of buoyancy he had found in the Dominion was duplicated in Great Britain.

Mr. MacDonald agreed that trade preferences played a large part in holding the Empire together, but said: "Trade is sometimes aickle jade. It is too often in the market place to be reliable. We must find something more."

Here Mr. MacDonald made his declaration of his idea of the essential bond of empire unity.

He continued with a discussion of freedom. A nation following the gleam of freedom, he said, a community. A commonwealth of nations would receive the homage of all the other nations of the world. That, he said, was his ideal of the British Empire.

Mr. MacDonald's vision of Canada's future was given in the following words:

"Canada, and this is the last word I shall offer you, has a future that is secure. As the years go on your population will get bigger and bigger, your factories will become larger and larger. You will develop your transport, you will exploit your hidden riches. The places that are now desolate will become busy hives of exploited industry. Canada, 50 years from now, Canada of a century from now, what rein are you to put on your imagination when you try to picture it? My friends, there is no nation on the face of the earth whose future is more secure than yours. Wealth will pour into your laps, money will come to you in abundance. Economic power will be yours. When some of the still new countries that are your neighbors will have passed beyond the middle age and begin to show flagging zeal of years, Canada will still be young; Canada will still be buoyant."

So my friends, with this feeling in my heart, I who have led a party and headed a government composed mainly of men who before they came to rule had never entered public buildings except as supplicants, I who with colleagues who know what the British Empire means, not as red patches on the map, but as hours and hours, days and days, weeks and weeks, and months and months, of almost unbroken labor required to be careful of it, required to defend it, required to guard it, required to advance it, required to keep its name and reputation clean and pure, come to you, and there is nothing in my heart except pleasure in meeting you and honor for the nation, its past, hope for its future. Nothing but those things are in my heart and that is what I have been trying, so imperfectly I am afraid, to express to you while thanking you for the honor you have done me."

"Don't trust him. He is a man who will stroke your back before your face and laugh in your face behind your back."—Pole Mole, Paris.

Sweeter Than Sugar

South American Plant May Be Valuable In Modern Diet

A substance two hundred times sweeter than sugar cane has been found in the desert regions of Paraguay, in South America. Scientists are experimenting to see whether its properties may not be valuable in modern diet. The plant belongs to the family of composites, of which the sunflower and daisy are familiar representatives. The sweetness it contains is not a sugar, but a glucoside somewhat similar to that found in the root of licorice. The leaves are dried and ground up, and a pinch of them is added to anything that requires sweetening; or they may be soaked in water and a sweet liquor prepared. One of the most valuable qualities of this liquid is that it does not ferment. The possible uses of such a plant are more or less obvious. It will particularly interest sufferers from diabetes, promising to furnish them with a sweetening that has none of the harmful properties of sugar. Extensive tests will be required, of course, before it can be said that the new substance is wholesome and free from all deleterious effect. The plant has perennial roots, so that cutting the stem does not terminate its life.

Winnipeg Newspaper Union

A Modish New Frock

Charmingly graceful in this attractive one-piece frock suitable for afternoon or evening wear. In View "A" contrasting material is effectively used for the front and back jabots, insets on the long sleeves, and the shirred tunic at each side which achieves the modish uneven hemline by extending below the edge of the skirt. In View "B" the frock is fashioned of one material and the sleeves are omitted. The neck and armholes are bound and a wide crushed belt fastens at the side. No. 1631 is for misses and small women, and is in sizes 16, 18, and 20 years. Size 18 (36 bust) requires 3 1/2 yards 38-inch, or 2 yards 54-inch plain material, and 3/4 yard 39-inch, or 1 1/4 yards 54-inch contrasting. View "B" requires 5 1/2 yards 38-inch, or 2 yards 54-inch material. Price 25 cents the pattern.

Every woman's desire is to achieve that smart, different appearance which draws favorable comment from the observing public. The designs illustrated in our new Fashion Book are originated in the heart of the style centres and will help you to acquire that much desired air of individuality. Price of the book 10 cents the copy.

VISITING CANADA

Here you have John W. Turpie, fifteen year old London schoolboy and member of the Westminster Troop of Boy Scouts, who worked his way to Canada and across to New Westminster, B.C., as a representative of his Troop, with which the New Westminster Scouts is affiliated. Turpie took a job on a Canadian Pacific liner for his Atlantic passage.

Why Russia Imported Wheat

Late Harvest and Depleted Reserves Is Given As Reason

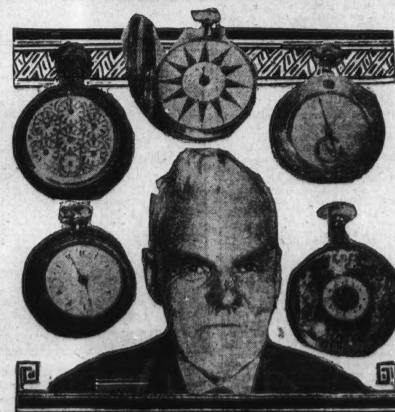

The fact that Soviet Russia recently has been importing wheat was admitted at Moscow by A. Mikoyan, trade commissar, in an interview with the newspaper Pravda.

Mikoyan said because of the late harvest and depleted reserves, the government has been unable to supply seeds to the districts where the wheat crop was a partial failure. The government, therefore, purchased 270,000 tons abroad, of which 80 per cent. already had arrived and the balance was expected before the end of this month. Despite the necessity for importing wheat, Mikoyan said he expected the crop to exceed last year's.

A combination watch and automatic lighter has appeared in London.

Canada extends over an area equal from Athens to the north pole.

Explorations Reveal Character And Resources Of The Great Northern Plains Of Canada

Maps Must Be Accurate

Map Making Is An Art That Requires Great Exactitude

The lithographing of maps is a craft requiring great exactitude, and lithographers have many troubles. Not the least of these is with paper that shrinks or expands though ever so slightly under varying weather conditions.

In Britain's African colony of Gold Coast all color printing for maps has to cease during January when the harmattan blows. The dry wind following rapidly on humid conditions causes a change in the paper of as much as a quarter of an inch in a sheet two feet square. This makes it impossible to secure registration of the colors in their precise places on the maps. Map-making in Canada is subject to the same difficulties, but in a lesser degree.

Paper used in map-making is of a superior kind specially made for the purpose. Most of the papers used for general purposes are too porous and too susceptible to damp for high class map work. Even when plaster of Paris and other fillers are used on them they are still subject to such great changes in dimensions as to be of little use for lithographing maps.

Good Work Of Reclamation Service

Heavy Gumbo Land In Alberta and Saskatchewan To Be Cultivated

As a result of experiments of between five and six years' duration conducted by the Calgary Branch of the Water Power and Reclamation Service of the Department of the Interior, between 5,000 and 6,000 acres of heavy gumbo land known as the Maple Creek flats in Alberta and Saskatchewan, will soon come under production for the growth of alfalfa. By irrigating a couple of town lots and experimenting with forage crops, it was proved that alfalfa and sweet clover can be grown on these flats with great success. It is possible some irrigation project to serve the whole lands will be developed.

Raise Pheasants In Alberta

The Medicine Hat Fish and Game Association have been experimenting with the raising of pheasants by supplying different people with the eggs. The Association now possesses 22 young birds and, in addition, will shortly have 20 grown pheasants shipped to them from Oregon.

Traffic Cop: "Hey, who do you think you are?"

Driver: "Oh, I'm just one of the taxpayers that pays you your salary for insulting me!"

As exploration and surveying reveal the character and resources of the great northern plains of Canada, former misconceptions of these great areas are disappearing. For many years, in fact for almost a century, nearly one-sixth of the area of the Dominion was branded "Barren Lands" and until recent years very little was done to reconsider the possibilities of these regions in the light of present-day conditions. However in addition to carrying on their regular work, surveyors and explorers of the Topographical Survey of the Department of the Interior have been gradually penetrating into the Great Northern Plains. With the advantage of modern instruments and the benefit of scientific and technical training, these officers of the department are enabled to make more accurate surveys of the country than was possible by early explorers.

How one of the first explorers of Canada's Middle West came to apply the name "Barren Grounds" to what has proved to be one of the most fertile areas in the world is given in the account of Henry Kelsey's explorations in the last quarter of the seventeenth century. One of Kelsey's longest expeditions was made between 1690 and 1692 when he travelled from Fort Nelson, on Hudson's Bay, by way of the Hayes and Saskatchewan Rivers. He journeyed in the company of a wandering band of Assiniboians into the heart of the western prairies. His diary affords interesting reading today, particularly the entry for August 23, 1691, which reads as follows:

"This instant ye Indians going on hunting killed great store of Buffalo. Now ye manner of their hunting of these Beasts on ye barren ground is when they see a great parcel of them together they surround them with men; which done, they gallop themselves into a smaller compass keeping ye Beasts still in ye middle and so shooting 'em till they break out at some place or other and so gett away from 'em."

Of the country itself, Kelsey states: "This plain affords nothing but short round sticky grass and Buffalo and a great sort of Bear web is bigger than any white Bear, and is neither white nor black but silver haired like our English rabbit. Ye buffalo likewise is not like those to ye Northwest, their horns growing like an English ox but black and short."

Kelsey's interest in the region was from the point of view of the fur trader and his possessions from an agricultural standpoint apparently never occurred to him. The country where he hunted the buffalo and the grizzlies now contributes hundreds of millions of bushels of grain annually and the "short round sticky grass" supports great herds of cattle.

A thousand miles north of the territory traversed by Kelsey, beyond the forested lands of the Canadian West and extending to the Arctic ocean and Hudson's Bay, are the Great Northern Plains to which Kelsey's epithet has been mistakenly transferred. Today's picture, given by recent explorers, is one of gently undulating country with lichens and mosses on the hills and shrubs in the valleys. It is true no trees grow north of the timber line and that there are certain areas lacking in vegetation, but the greater part of the region is so fertile that being barren that it actually supports at the present time in addition to the fur-bearers and musk-oxen, hundreds of thousands of caribou.

Live Stock Marketing

The annual meeting of the Saskatchewan Livestock Co-operative Marketing Association was recently opened at Moose Jaw. The association was shown from reports to have emerged from a year of splendid growth. During 1921 1,500 carloads of cattle were handled by the association.

The public at large is but an elevator used to hold the chosen few to prominence.

Cleanse The Pores With Cuticura Soap

And have a clear, fresh complexion, free from pimples, redness or roughness. Clogging and irritation of the pores, the usual cause of pimples, may be prevented by making Cuticura Soap your every-day toilet soap, assisted by Cuticura Ointment when required.

Sample Soap Free by Mail. Address: Cuticura, Cassell, Inc., 150 West 17th St., New York, N.Y.

WORLD HAPPENINGS BRIEFLY TOLD

Increasing alarm is being expressed over the unemployment situation in Great Britain, with 1,300,000 men out of work.

Two new brands of whisky, approved by the Ontario Liquor Control Board, have been put on the market by the commission. The varieties are styled "Commission No. 1" and Commission No. 2," and bear the seal of the board's approval on the bottles.

Dr. Paul, chief chemical analyst for the Surete Generale, the French Scotland Yard, is reported to have detected toxic matter in the viscera of Captain Alfred Loewenstein, Belgian financier, whose death recently was surrounded with mystery.

Four men held up the First National Bank of Buxton, N.D., and escaped with between \$3,500 and \$4,000. They made their getaway in a dark blue Buick sedan heading east out of Buxton, which is about 65 miles north of Fargo.

Baron Von Huensfeldt, owner of the trans-Atlantic monoplane, the Bremen, which Captain Hermann Kiehl and Col. James Fitzmaurice piloted across the Atlantic, will make a present of the disabled plane to the projected municipal museum of New York.

Investigation of the immediate power requirements of the city of Saskatoon is to be made by a committee of the Saskatchewan Government, with a view to working out a plan under which a start can be made in the production and sale of power under central control.

Owing to inadequate steamship accommodation, it will be impossible to transport to Canada full quota of 10,000 unemployed which were to work in the Western harvest fields, according to J. Bruce Walker, director of European immigration for Canada. He states that possibly not more than 8,500 would be taken to Canada from all sources.

Its Quality Sells It—The fact that so many thousands of intelligent people continue to use Dr. Thomas' Electric Oil speaks volumes for its healing efficiency. Ever since it was first introduced it has grown steadily in public favor, owing entirely to its manifold usefulness in relieving and healing sickness. As a specific for cuts, burns, scalds, and various inflammatory pains its record is beyond reproach.

The total number of radio fans throughout the world is stated to be ninety millions.

Nearly 8,000,000 bicycle riders are in the British Isles this season.

The "military pace" is reckoned at two feet six inches.

HE DIDN'T THINK DYSENTERY COULD BE RELIEVED

Mr. John Melling, Fenner, Alta., writes:—"I am a returned soldier, and when I came home from overseas I suffered greatly with dysentery. The doctor said it was chronic and did not think it could be relieved. However, he doctored me for quite a while, but did me no good. One day the druggist asked me if I had ever tried

"40" his recommendation I bought a bottle and after I had taken it got some relief, so I got two more, and have never had the dysentery since 1920."

Put up only by The T. Milburn Co., Limited, Toronto, Ont.

Farmers' Marketing Tour

Canadian National Railway's Tour To Great Britain and Denmark, 1928

(Continued.)

We were now in the home of the Clydesdales, and a call by Mr. Weir, from Newcastle, in the morning had brought a pressing invitation from Messrs. A. & N. Templeton, of Sandy Knowe, near Kelso, to visit them. This took a section of our party to see the great horse "Benefactor" and some of his progeny as well as the hands to meet the best curlew, Messrs. Templeton and here we had our first taste of Scottish hospitality. The brother and sister who were to entertain us royally to a delightful tea and the "wee drappie" was not missing. Ours was a great privilege because the afternoon was lovely and from the high ground at Sandy Knowe the eye can roam for twenty to thirty miles in every direction over the beautiful Scottish countryside. On our visit over, we continued our journey to Edinburgh, arriving the night with old familiar songs.

The "main body" had gone on, passing through Dalketh at dusk, awakening many memories for one of the members of our party, Mr. James Walker, representing the Canadian Bank of Commerce, Toronto, who was born in this pleasant Scottish town. Evening found us in Edinburgh, comfortably established in the North British Hotel, overlooking the famous Princes Street.

From Melrose we had sent a challenge to meet the best curlew, Mr. Park, owner among other notable stock of "Brunstane Again" and "Brunstane Again," both of which, along with a number of fine colts, were shown for our benefit. To our astonishment, these animals, including the great stallion, were put through their paces by Mr. Park's twin daughters, aged seventeen, whose competent horsemanship delighted us all, as did their modesty. Mr. Park is a well-known "fancy" Clydesdale, but prefers to breed for scale and power, and we listened with interest as he expounded his breeding principles.

Mr. Park took us into his home, "Brunstane House." Here Mrs. Park and her daughters entertained us to a tea in the room where the committee meeting was said to have been held when the Union of Scotland and England was decided in 1707. The room is eight-sided and contains a 14th century fireplace. But all eyes were turned to the great sideboard on which were two "Cador" Cups, both won in the same year by sire and daughter—"Brunstane Again" and "Brunstane Again."

A trip to the famous Fort Bridge, reminding us so much of our own Quebec Bridge, completed our first day in Edinburgh.

Leaving for Stirling at 8 a.m. en route for Perth, we were treated to a taste of Highland weather, for snow began to fall by the time we reached Stirling Castle. This forbidding stronghold, perched high on a dominating rock overlooking the plain beneath, is interesting at any time, but seen through a Scottish mist and falling snow, it was doubly fascinating.

Next we came to the wonderful Wallace Monument, a great stone tower, four square, 220 feet high and standing 520 feet above the level of the Forth. In a niche on the west corner stands a bronze statue of Wallace, measuring 15 feet from heel to helmet, to the tip of the sword 21 feet and to the knee 60 feet above the doorway—a noble figure.

sword on high, summoning his followers. Those of us who climbed the inside spiral stairway of 246 steps were amply recompensed. The inner chambers are noted among other things for a wonderful echo and in one of them, the double-edged sword of Wallace, 4 feet 1 inch long in the blade which measures from 2 1/2 to 3 1/2 inches. The leather mounted hilt is 12 inches long and has a two inch pomell. For six centuries Wallace's sword lay in Dumbarton Castle, being transferred to the Monument by Hugh R. Wallace, of Glencairn Castle, his nephew and heir.

Snow still falling, we arrived in Perth, the prettiest city by the Tay. Perth is not a big city but its charm is real. Moreover its fame as a livestock center is world wide. For many years it has been the most important centre in Britain for the selling by public auction of pedigree Shorthorns and Aberdeen-Angus cattle and our arrival coincided with the biggest sale of the year.

Following lunch and a warm welcome from Lord Provost Dempster, we were soon watching with critical eyes the judging and street parade of cattle, noting with admiration the high grade of quality prior to taking our places next day in the auction room.

Accommodation in Perth was so taxed by the sale that nearly half our party had to spend the night in Dundee, an opportunity of seeing the Duke City which was appreciated. Back in Perth we had the pleasure of hearing Mr. Lovat Fraser, the greatest livestock auctioneer in Great Britain. Mr. Fraser frequently sells pedigree stock at 50 animals per hour for several hours at a stretch. He did not baffle his fate, for animal after animal was sold during the half day of several hours at a stretch. The sale of the sale, so far as we Canadian farmers were concerned, was the excellent quality of stock that was sold at distinctly reasonable prices.

The sensation of the sale was the fetching of 3,500 guineas by Captain John MacGillivray's Supreme Champion, "Chalmers' Ideal Event," which was bought by Mr. James Fingert, the well-known exporter to the Argentine.

(To Be Continued.)

Louis Tracy Is Dead

Well Known Author Of Popular Stories Passes Away At His Home In Kent

Louis Tracy, author of many novels and detective stories, died recently at his home near Ashford, Kent. He was born in 1863, and educated privately in Yorkshire and France. In early life he was a journalist and writer with travels.

He was attached to the headquarters staff of the British war mission in the United States in 1917. In 1921 he collected a large sum for the restoration of Westminster Abbey.

All mothers can put away anxiety regarding their suffering children when they have Mother's Own Worm Expeller to give relief. Its effects are sure and lasting.

Newsprint Production

Newsprint paper has formed over 80 per cent of the total production of Canadian paper-mills since 1917. In 1926 it was 83.4 per cent.

Minard's Liniment—a reliable first aid.

"Man wanted for gardening, also to take charge of crew who can sing in the choir and blow the organ."

RESCUES TRANS-ATLANTIC FLYERS

Buffeted about by waves in their fragile seaplane in mid-Atlantic, Capt. Frank T. Courtney, E. B. Hosmer, of Montreal, son of a former Dominion-wide financier, his financial backer, Fred Price, mechanic, and E. W. Gilmore, of Glasgow, wireless operator were succored by the Atlantic Transport liner Minnewaska a few days ago. Capt. Courtney and the other three were attempting a flight from the Azores to Newfoundland, when their machine ran in flames into the sea. By the aid of their small radio set the Minnewaska found them after she left her course to go to their aid. The Minnewaska reached New York on August 6 with the rescued flyers. Photograph shows the Minnewaska and inset left, Capt. Courtney; inset right, E. B. Hosmer. Photos by White Star Line.

SUNDAY SCHOOL LESSON

AUGUST 26

PAUL AT PHILIPPI

Golden Text: "Rejoice in the Lord always: again I will say, Rejoice."—Philippians 4:4.
Lesson: Acts 16:16-40.
Devotional Reading: Isaiah 55:1-13.

Explanations and Comments

The Second Christian Convert In Philippi. Verses 16-18.—Paul was greatly disturbed at Philippi by a fortune-telling maid who kept following him and Silas and crying, "These men are servants of the Most High God, who proclaim unto you the way of salvation." Professor Ramsay thinks that the slave girl's mind had become distorted and diseased by her belief in her supernatural possession, but was all the more acute in certain perceptions and intuitions, and that she had become alive to the normal influence which the intense faith of the strangers gave them.

The girl followed Paul and Silas for many days, and her reiterated chant drew a crowd of curiosity seekers. Paul was "more troubled" and at length he turned to her, and in the name of Jesus Christ bade the spirit leave her and she became wholly normal. Nothing further is told about this girl whose story arouses our sympathy. One writer expresses his belief that "She would partake of the generous help of Lydia and of the other Christian women at Philippi, who would see in her no longer a bond-servant of the men who had dominated her, but a sister beloved in the Lord."

Dissect Brain Of Lenin

Bolsheviks Analyzing the Gray Matter Of Brain Of Apostle Of Communism

A Toronto Mail and Empire special from Paris says: "The brains of the late Nicol Lenin, the Bolshevik dictator, has been cut up into 31,000 slices and particles. For two and a half years the entire scientific staff of the Lenin Institute, at Moscow, under the direction of the famous German anatomist, Professor Otto Vogt, has been busy with the task of dissecting, analyzing and preserving the gray matter of the apostle of Communism.

"In the case of the body of the dead leader a secret method of embalming was evolved that is now recognized to insure the perfect preservation of the mummy for several centuries."

Take Up Homestead Lands

Demand Has Been Very Brisk In Northern Alberta

Demand for homestead land in the northern part of Alberta continues very brisk, judging from the records at Grand Prairie and Peace River. At this former point 239 entries were reported during the month of June, making a total of 732 for the three months period ending June 30th, and at Peace River 400 entries in June, making up a total of 1,040 for the three months.

A bank failure may not upset the depositor, but it will cause him to lose his balance.

After it is too late a man thinks of a lot of bright things he might have said.

Countless tests and experiments, covering a period of over thirty years, prove that aluminum is the only completely satisfactory material in which to pack **Red Rose** tea is put up only in aluminum, and a "money-back" guarantee goes with every package. sw

Was Eminent Western Counsel

C. C. McCaul, K.C., Prominent Lawyer, Dies At His Home In Edmonton

Long prominent as one of Western Canada's most brilliant lawyers and a pioneer of forty-five years' standing, C. C. McCaul, K.C., aged 70, died at his home in Edmonton, recently, after a lingering illness.

Legal and business circles were shocked upon learning of the death of this eminent counsel, one who had taken a leading part in some of the most important cases heard in the Dominion. Known and held in high regard in the prairie provinces, in British Columbia and in the far away Yukon, where he was one of the hardy pioneers who went through the gold rush, C. C. McCaul had a wide circle of friends and acquaintances. From 1883 to 1888, Mr. McCaul practiced law at Fort Macleod and then he removed to Lethbridge, where he established a law partnership with F. W. H. Haultain, who had opened a law office in Macleod in 1884, and later became chief justice of the Northwest Territories.

Minard's Liniment For Bilister Feet.

Goes To Experimental Farm

J. G. Davidson, Of Saskatchewan University Receives Appointment

Announcement is made of the appointment of J. G. Davidson, B.S.A. (Saskatchewan University), M.S.A. (McGill University), to the position of assistant superintendent of the Dominion Experimental Farm at Indian Head, filling the vacancy created with the advancement of G. D. Matthews to the superintendency at the Scott farm.

Mr. Davidson comes from Kelvington, Sask., where he farms when not engaged in his university studies. He is a married man and will move his family there shortly.

"What are diplomatic relations, father?"
"There are no such people, my boy."

It May Be Urgent

When your Children Cry for It

Castoria is a comfort when Baby is fretful. No sooner taken than the little one is at ease. If restless, few drops soon bring contentment. No harm done, for Castoria is a baby remedy, meant for babies. Perfectly safe to give the youngest infant; you have the doctors' word for that! It is a vegetable product and you can't use it every day. But it's in an emergency that Castoria means most. Some nights when constipation must be relieved, or colic pains—or other suffering, never be without it; some mothers remedy their babies' troubles by making sure there will always be Castoria in the house. It is effective for older children, too; read the book that comes with it.

Fletcher's CASTORIA

HON. PHILIP ROY RECOMMENDED AS ENVOY TO PARIS

Ottawa.—Hon. Philippe Roy has been recommended by the Dominion Government to His Majesty the King for appointment as Canadian minister plenipotentiary to Paris, Premier King has announced.

Mr. Roy has been Canadian commissioner in Paris for the past 18 years.

No action to appoint a Canadian minister to Tokyo has yet been taken, the prime minister said.

It is expected that the formal commission for the appointment of Mr. Roy will be issued by His Majesty in time for the opening of the legation in Paris during the first week of October.

Mr. Roy was born on December 18, 1868, at St. Francois, Que., and was called to the Senate on March 8, 1906. He was appointed to Paris on May 1, 1911, being one of the administration of the late Sir Wilfrid Laurier. Mr. Roy was also appointed agent-general for the province of Quebec at Paris on January 15, 1912.

Message From Amundsen

Believe Note Found in Bottle To Be in Handwriting Of Lost Explorer.

London.—Despatches to the Daily Mail from the Hague state that the Norwegian Minister at Amsterdam announced an apparently genuine message from Roald Amundsen, noted explorer who was lost while participating in the expeditions seeking the crew of the wrecked Polar dirigible Italia, had been found in a bottle near Rottumeroog.

The message, which was compared with Amundsen's handwriting and was said to be authentic, gave the position of the explorer and his party on July 1.

Rottumeroog is in the Netherlands Islands in the North Sea.

Amundsen and four companions have been missing since they started in a French seaplane to search for the Italia party.

Inspect Australian Ship

12,000 People Visit New Cruiser During Stay At Montreal.

Montreal.—H.M.A.S. Australia, flagship of the Royal Australian Navy, sailed for Quebec following a visit of several days to Montreal. It is estimated that 12,000 persons visited the new cruiser while she was here.

The Australia will remain at Quebec four days, following which she will proceed to Halifax, which will be visited on August 22. Other places to be visited include Boston, August 25; New York, August 30; Chesapeake Bay, September 4; Colon, September 17; Tahiti, September 20; Wellington, N.Z., October 9; Brisbane, Australia, October 17; Sydney, N.S.W., October 23.

Recognition Of Ecuador

United States Now Convinced Of Country's Good Intentions

Washington, D.C.—The United States has accorded complete recognition to the Government now functioning in Ecuador, the State Department announced.

Secretary of State Kellogg has informed the Ecuadorian Government by note that beginning immediately the United States, convinced of Ecuador's good intentions to return to a constitutional form of government, which it abandoned in 1925, accord recognition to the present regime.

Will Visit Ireland

Washington.—Secretary of State Kellogg has practically decided to visit Ireland after signing the fifteen-power anti-war treaty in Paris, August 27, in order to return the call of President Cosgrave of the executive council of the Irish Free State made during his visit to this country. It is not unlikely that Mr. Kellogg also will visit London.

Canada has six seismograph stations for measuring and receiving earthquake shocks.

W. N. U. 1747

Receives Re-Appointment

Dr. McLean To Be Assistant Chief Commissioner Of Rail Board

Ottawa.—Dr. Simon J. McLean, Ottawa, has been re-appointed assistant chief commissioner of the board of railway commissioners. Dr. McLean's term of office expired August 6, and his re-appointment is for a further period of ten years. Dr. McLean was originally appointed to the board in 1908.

The term of Commissioner Frank Oliver will terminate toward the end of September, when Mr. Oliver will have reached the age limit of 75 years.

Dr. McLean drafted the Dominion Railway Act, and his re-appointment for a third term creates a precedent. Since the formation of the Board of Railway Commissioners in 1904, Dr. McLean has been the only commissioner to be re-appointed after expiration of the ten-year term.

While no official statement has been made in the matter, it is rumored that legislation may possibly be introduced at the next session of Parliament providing for the superannuation of members of the board.

To Take Care Of British Harvesters

Effort Will Be Made To Provide Permanent Work Throughout Winter

Saskatoon, Sask.—If the British miners who are coming to the west to work in the harvest fields do not obtain permanent work throughout the winter it will not be the fault of the railway companies or want of effort on their part.

No one will be left returned to try to keep these men here and the opinion of T. Devlin, local manager of the Canadian National colonization department, future immigration from the British Isles depends largely on the success or failure of this venture.

Mr. Devlin said that he could see no reason why the project should not prove an outstanding success. "The men who are coming are by no means strangers to hard work and they know just as much about farm work as the average harvester from Eastern Canada," he says.

Death Of Canadian Novelist

Mrs. Isabel Ecclestone Mackay, Dies At Her Home In Vancouver

Vancouver.—Mrs. Isabel Ecclestone Mackay, Canadian novelist, poetess and playwright, wife of Peter J. Mackay, official reporter of the Supreme Court of British Columbia, died at her home here after a year's illness. She was born in Woodstock, Ont. 52 years ago.

The late Mrs. Mackay was the daughter of Mr. and Mrs. Donald MacLeod MacPherson, of Woodstock, and came to Vancouver 19 years ago.

She was the authoress of several novels, including "House of Windows," "Up the Hill and Over," "Mist of Morning," "The Window Gazer," and "Glenarow." Mrs. Mackay was also the writer of a book of lyrics, "Flies Of Driftwood," and a volume of poems for children entitled "The Shining Star."

She also wrote a number of plays which have been produced in Canada and the United States.

In addition to her husband she leaves three daughters.

Gold Strike In Ontario

Rich Find Is Reported In Vicinity Of Mine Centre

Toronto.—A special despatch to the Mail and Empire from Lechabals, Ont., says:

"Reports from Mine Centre, west of Port William, on the Canadian National Railways, bring word of what is described as a sensational gold strike made on the Johnson claims at that point. The claims are located south of the Foley mine of British-Canadian Mines, Ltd., and east of Little Vermilion Lake."

"A mining engineer returning from the scene of the strike says that the ore taken from the surface is glittering with visible gold which would run thousands of dollars to the ton, and is said to equal or even eclipse the remarkable find made on the Inabella property of Northern Red Lake Mines, Ltd., reported several weeks ago."

Heads Native Sons Of Canada

Dr. J. H. Cotton, of Toronto, was elected president of the National Council of the Native Sons of Canada at their annual meeting in Regina. Dr. Cotton is the first eastern member of the organization to be appointed to the presidency. Formerly he was appointed to the vice-presidency of the council.

Expedition Well Equipped

Commander Byrd's Antarctic Venture May Cost One Million Dollars

New York.—The Antarctic expedition of Commander Richard E. Byrd, which starts from this port this week, will be the most extensive expedition in the history of exploration and may cost one million dollars.

At the expedition's headquarters here, it was said the cost would be not less than \$850,000, and before the expedition returns to this country may reach \$1,000,000.

Contributions received to date include \$425,000 worth of equipment and \$237,543 in cash.

The total expense of Commander Byrd's North Pole expedition in 1926 was \$140,000.

Fuller Party Reported Safe

Have Been Re-provisioned and Are Now Headed For Shores Of Hudson Bay

Regina, Sask.—Three weeks ago the John D. Fuller expedition of student geologists from Iowa into the north was safely launched on a new and shorter route to Hudson Bay.

The four men, who have been almost given up as dead for the past six weeks, have been re-provisioned and given new equipment for the trail. They are now headed along the route through Neulith Lakes and smaller bodies of water and down the Thielvina River to Hudson Bay. They are expected to emerge near Driftwood Point, halfway between Chesterfield Inlet, their first objective, and Fort Churchill.

BRITISH STUDENT HARVESTERS

British university students seeking information, experience and adventure are coming to Canada to help with the harvest in the West this year and places for them are being found by the colonization department of the Canadian National Railways. If they are all of the type of the first four to arrive in the West both Canada and Great Britain should gain by their enterprise. The photograph shows the advance guard of four of these men. From left to right, with the places where they are stationed, they are: W. D. Harrison (Marcell, Sask.); E. A. Corcoran (Wellington, Sask.); F. W. Seale (Carleton, Sask.); and J. D. Preston-Jones (Atwater, Sask.).

Hope For Peaceful Relations

Kellogg Peace Pact a Revolutionary Policy Among Nations

Wausau, Wis.—Within a fortnight of the date on which the international treaty for outlawing war is to be signed, President Coolidge declared before the Wisconsin State American Legion here, that the Kellogg pact "holds a greater hope for peaceful relations than was ever before given to the world."

The President maintained that by taking a leading position in securing this agreement, the United States proved its pacific inclinations toward all nations.

"We have demonstrated," Mr. Coolidge declared, "that when we have said we maintained our armaments, not for aggression, but purely for defence, we were making a candid statement which we were willing to verify by our actions."

Th President said that while "it would be too much to suppose that war had been entirely banished, yet new and important barriers, reasonable and honorable," had been created to bar it.

"This agreement proposes a revolutionary policy among nations," he said. "It holds a greater hope for peaceful relations than was ever before given to the world. If those who are involved in it, having started it, will finish it, its provisions will prove one of the greatest blessings ever bestowed upon humanity. It is a fitting consummation to the first decade of peace."

Influenza In The North

Serious Epidemic Has Broken Out In Mackenzie River District

Winnipeg.—A serious epidemic of influenza has broken out along the banks of the Mackenzie River with considerable loss of life, according to a letter received from Rev. W. B. Singleton, principal of the Hay River Indian school of the Indian and Eskimo mission of the Missionary Society of the Church of England.

At Fort Resolution, where Slave River flows into Slave Lake, 20 deaths were reported. At Hay River, towards the west end of the lake, there were ten deaths. The toll of deaths at other points was thought to be even greater, the letter stated. The Manitoba Division, Dominion Department of Indian Affairs, had received no information of any epidemic in this province.

Miners For Harvest Fields

The Pas, Man.—Men are flocking in from railway construction camps along the Flin Flon railway seeking higher wages in the harvest fields in the interior. Five hundred men have departed from The Pas on the last two trains going south.

SPIRITED FIGHT ON LAKE ERIE WITH RUM FLEET

Buffalo.—The struggle for supremacy between the rum running fleet on the Niagara River and Lake Erie blazed into spirited action in which government boats set afire and sank one craft and captured two others carrying contraband liquor and ale.

At Niagara below the Falls a speedy boat carrying many cases of both whiskey and ale fell into the hands of the federal patrol.

Earlier in the day the C.G. 121 sighted a suspicious looking craft off Brocton, on Lake Erie. A chase followed during which the government boat fired 50 rounds.

After the gun fire had set the rum runner ablaze the coastguard boat took off the crew of two men and stood by while the damaged craft burned to the water's edge.

The other boat was caught on Lake Erie, off Barcelona. Three hundred rounds were fired at it before the crew decided to heave to and surrender. Two men and a small quantity of liquor were found.

Praises Pool System

Toronto Professor Says Pool Has Revolutionized Morale Of Farming Community

Williamson, Minn.—Agricultural co-operation is not merely a marketing device but a means of lifting the farmer to a plane of greater prosperity and keeping him there, Prof. C. R. Fay, of the University of Toronto, told the Institute of Politics here.

"In Canada," he said, "the wheat pool has revolutionized the morale of the farming community, relieving the farmer of the difficulty of deciding when to sell, eliminating the pressure to sell at certain seasons, and basing all farm marketing on statistical knowledge."

The co-operative system he declared, is of special benefit to the small farmers, whose plane of living has been raised to the highest level it ever reached.

In the United States the government's attitude toward the farmer's problems is one of encouragement through active assistance in research and educational facilities, C. L. Christensen, chief of the department of co-operative marketing of the department of agriculture, said.

All Bitterness Forgotten

Remarkable Tolerance Is Shown In Irish Free State

Victoria, B.C.—Right Hon. Hugh Kennedy, chief justice of Ireland and honorary member of the American and Canadian Bar Associations, was the guest-speaker at the Canadian Club luncheon here.

"We had a fight with England but that fight terminated in a treaty of peace," he said, "and reconciliation was reached which I believe has wiped out the rancor which existed in the past," the chief justice said.

One of the first steps in the re-organization of the country was placing agriculture on a firm basis, as agriculture for years to come would continue as the foundation of prosperity in Ireland, he said.

He said that the Free State had shown a remarkable degree of toleration with the view of religion never entering into politics. As an example, he referred to the fact that the minister of finance was a Presbyterian from an Orange county.

Montreal Garment Workers Quit

Montreal.—Twelve hundred employees and 70 work shops in Montreal are affected by the present "stoppage" of work of local members of the Amalgamated Clothing Workers of America. It is not spoken of as a strike by union officials because not all the shops of the city are affected. Speedy termination of the dispute is expected.

Mine Blast Is Fatal

Calgary.—L. L. Johnson, for years chairman of the Department of Soldiers' Civil Re-establishment at Calgary, was instantly killed when a charge of dynamite exploded prematurely in Mr. Johnson's mine at Dods, Alta., according to information received here.

MR. N. P. DAVISSON,
Field Supervisor for the Alberta Wheat
Pool, will give an Address.

Here and There

(115)

The Maritime Livestock Market
was organized in March, 1927, to
market Maritime livestock—chiefly
hogs, lambs and some cattle—for
7,000 members of over eighty clubs
in the three Maritime Provinces.
The report of the first year shows
\$552,617 received for 29,417 lambs,
19,918 hogs, 20 calves and 414 cat-
tle.

An extension to the air express
services maintained by the Cana-
dian Pacific Express Company has
been announced, and a new air line
will be opened early in September
between New York, via Albany, and
Montreal. Lines are already operat-
ing between Rimouski, Montreal,
Toronto, and Ottawa.

A name of unusual distinction
will be added to the Canadian Pa-
cific's Royal Family of ocean steam-
ships when the fourth 20,000 ton
vessel of the new "Duchess" class is
launched in Scotland. She will be
named the "Duchess of York" and
will be christened by Her Royal
Highness the Duchess of York her-
self, the ship's name being recently
changed from the "Duchess of
Cornwall."

Despite the doubts of nervous
tourists, the grizzly bear is more
attracted by the sight of a
huckleberry bush or a stream
full of fish than the prospect
of a juicy specimen of human-
ity, and the splendid crop of
huckleberries now in British Col-
umbia will probably contribute to
a successful hunting season during
the month of September and the
early part of October.

Port William, Ontario. — Three
grain elevator corporations with
large interests at the Head of the
Lakes are involved in a merger of
several powerful Canadian terminal
and line elevator companies, the
new company being known as the
Canadian Consolidated Grain Com-
pany. A total of 12,000,000 bushels
of elevator capacity will be
owned and operated by the new
company.

Betty and Buster Bruin, two lit-
tle black bear cubs, have sailed
from Montreal for Italy where they
will be presented to the Marquis
de Pineto, the famous Italian
round-the-world flier. They are
woolly babies, scarcely larger than
a child's toy teddy bear, and of an
amiable disposition. They were
obtained by Mr. E. Roncarelli of
Montreal, through the General
Tourist Department of the Cana-
dian Pacific Railway, and are sim-
ilar to the little bears sent over by
him a few years ago to Mussolini.

The Dominion Government is go-
ing in for pigeon breeding with

for purposes of communication.
The Department of National Defence
is to have charge of the work. The
Civil Service Commission has an-
nounced an open competitive ex-
amination for a pigeon-loft manager
in connection with the civil Govern-
ment air operations of the Depart-
ment of National Defence, to or-
ganize and administer a pigeon
communication service.

The Canada Goose makes re-
markable migratory flights but it is
not generally known that civiliza-
tion has so far effected his habits
that sometimes he travels by rail-
way. A pair of wild geese enjoy-
ing this modern luxury passed
through the Windsor Station, Mon-
treal, under the proverbial wing of
the Canadian Pacific Express in a
specially constructed crate. There
are a number of bird sanctuaries
throughout Canada and the United
States where plumed geese are
kept to reassure their comrades
that all is safe and secure for
them to stop and rest on their
flights north and south.

WHY SUFFER WITH HEADACHES?

Why not have your eyes at-
tended to now, before it
is too late?

My prices are fully 25 p. c.
cheaper than elsewhere, as
I buy vast quantities direct
from the factories.

CHAPTER XXX—Continued

"Here are Helmi's letters," at length said Warner; "they belong to you now. They will tell you everything. If we both get over I will take them back, after you have read them. I think if I had had a wife like Helmi I would not have doubted her. I don't think I would. However I am not saying that to hurt you—no one knows what he would do. Anyway I am glad I met you, Jack. And your wife is well and so is little Lilu."

"And so you see you must get through. I may, but you must, and if you do you will tell Helmi. Come on—our chance is just as good now as it ever will be."

Jack took his hand and pressed it. "Arthur, I can't tell you what I want to say—you have been a better friend to Helmi than I have."

The bridge was a fine iron one, with heavily studded pillars. Every second light was burning. The road leading to it was not much travelled, and as they walked up the long approach their feet made a strange echoing sound. They had left their blue overcoats open, showing the gray German smocks. Jack knew what he was to say in German if accosted, but their hope was that no one was on the bridge. Every step brought them nearer, and the lights ahead of them on the Holland side twinkled like the lights at home.

Jack's heart was in a strange turmoil over what he had heard. . . . On, on—they were half-way over now. . . . steps echoing, echoing. . . . no sound but the gentle murmuring from the other side, gentle sounds. . . . dogs barking. . . . cow-bells. . . . they must hurry. . . . on, on. . . . ten feet from the end now!

Suddenly from behind the last pillar stepped out a German guard, who thrust a flashlight in their faces, blinding them with its sudden gleam. At the end of his rifle a bayonet gleamed in the light.

"Halt!" he cried.

"Why do you halt us?—We are honest men," said Arthur quietly.

"Give me your passports, then."

WOMAN SO
SICK COULD
NOT WORK

Helped by Taking Lydia E. Pinkham's Vegetable Compound

Grainland, Sask.—"I am glad that I heard of that good Lydia E. Pinkham's medicine and I will not be without it again. I was so sick that I could not work at all and could not sew on the machine. My aunt told me of Lydia E. Pinkham's Vegetable Compound and now I am telling all of my friends how good it is and how it will answer all letters I get from women."

—Mrs. MARY SCHULTZ, Grainland, Sask.

W. N. U. 1747

said the guard, putting away his flashlight, but not lowering his rifle. Pretending to search his pockets, Arthur moved a rifle, then like a tiger he sprang on the guard, grasping him around the neck.

"I'll hold him, Jack!" he shouted.

"Beat it! you're safe! Beat it!"

Jack found refuge in the trees on the other bank. There was a queer singing in his head, something drowning like a swarm of bees. Then came a sudden pain in his shoulder like a knife thrust, and looking down, he saw the blood running off his fingers. He crawled to the edge of the trees and looked back. Three guards were standing together, talking excitedly. He could see nothing of Arthur, but the smoke of rifles still hung around the pillars of the bridge. He crawled back into the trees and lay on the damp leaves, sobbing like a child. He was free; he was safe; but the loss of his friend was heavy on his heart.

CHAPTER XXXI.

It was a hot night in the early spring. The lights shone ghostly blue through their painted globes and across the dark, single search-lights stretched their spectral fingers, crossing, passing, converging, crossing again. Through the streets, in spite of the sombre gloom and the dangers of the night, an endless stream of people drifted, making a brave show of unconcern. The streets were crowded, the dance halls echoed with rhythmic feet, and tinkled with laughter; and although grief, fear, and a sense of loss walked with every soul in London, the sound to the ears of the crowd was the sound of laughter and singing, true to the brave old British tradition.

At Victoria Station the V.A.D.'s were assembled with their waiting stretchers, for a hospital train was coming in. There were the usual noises of a great station—hooting of sirens, blowing of horns, calling of railway officials—all the sounds multiplied by the vaulted station roof. There was the usual variegated and cosmopolitan crowd, though the dominant note was the shrill of the thickest, calm-faced Englishman; here the slim Canadian, independent and alert, actually looking for some one, and not ashamed of appearing anxious; there the blue-uniformed French officer, dragging through the crowd like a gorgeous bluebird.

They are removing men of stretchers now, and the V.A.D.'s are busy. Very skillfully they manage to roll the bedcases to the stretchers and carry them to the waiting ambulances—pallid faces, all of them, some bandaged, but most of them smiling bravely, too, and glad to be home.

There is one V.A.D. looking very slim in her blue serge uniform who wears feverishly. She is returning with an empty when she meets the walking cases coming out of their couch, some on crutches, some being helped by companions, arms in slings, bandaged faces, but all on their feet. She stops with a cry of gladness.

"Jack, oh, Jack!" she cries, as a young man with his arm in a sling is passing. "Jack—it's Eva—don't you know me?"

She threw her arms around him. "It's my only brother—my only brother," she says to her companions, who wait for her. "Jack, are you a hospital case, can you come with me? I have a flat, I can put you up. All right, wait for me inside on the first bench—I'll be through in half an hour."

Jack sat on the bench inside watching the crowds endlessly milking around him. He was surprised to meet his sister here when he believed her to be safe in Winnipeg. He wondered what had brought her to London—Eva, the luxury-loving, indolent Eva. It was strange to see her in plain uniform, carrying stretchers. But there was a high look on her face that transformed her. She looked more like the Eva he had known long ago.

Eva came for him at last and led him to the rear of the great station, where endless cars were parked, and put him into one which seemed very small and low.

"We pay a license according to wheel base, you know," she laughed; "and anyway, a car is a car, no matter how small it is. Oh, Jack, it's good to see you, and I have a bed ready for you. I've kept lots of the boys—I've been here six months."

Eva brought him to her flat in

Maida Vale, and switched on a light, revealed a luxurious living-room, all in black and silver.

"Do you like it, Jack?" she asked with evident pride. "I work all day in misery and horrors so I have to have beauty at night."

A large black velvet divan, with round back, cushions occupied one side of the room, the rug was black with a faint silver border—the fireplace black and white tiles, and on the mantel were silver candlesticks and a silver wrought image of the Madonna. On the black lacquered table stood a silver basket with American Beauty roses.

A slim maid appeared with coffee and sandwiches.

"We'll have a real meal later, Jack," said his sister. "And now tell me where you have been."

"First," said Jack, "tell me how you happened to come over?"

Eva laughed. "You will wonder, I know, but I couldn't stand it after the old crowd broke up—and I guess I missed Humphrey, too, though I won't admit it, because we had a row before he left, and he said things to me I shall never forget. But anyway, everyone was knitting and making bandages, and I couldn't get into it. So I rented the house and I can live easily here on the money. I really like the work I am doing, and I love the boys—they are so brave. I bring them home with me sometimes and write their letters and listen to their stories. I have one little extra room—and really, Jack, I never was so happy in my life. Now tell me your story."

Jack told her of his capture, imprisonment, escape, his friend Arthur Warner and his sacrifice.

Eva's eyes were filled with tears as she listened. Oh, Jack, wasn't he brave? But why did he do it—why did he love you so?"

"It was not for me—it was his love for my wife!"

"Why, Jack, I didn't know they were married. Now begin at the beginning, wait, do you want to go to bed first? You look pretty white. I mustn't let you tire yourself. You see I am a pretty good nurse now, and I know how to take care of people."

"No, I am fine," said Jack; "my shoulder is nearly well again. I have had two months in the hospital with it, and I want to tell you all about it."

Jack began with his meeting with Helmi at Eagle Miao, their marriage by the magistrate; the magistrate's objections, and his showing of the newspaper report.

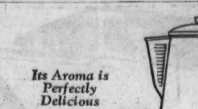

(To Be Continued.)

Wool Grading Centre For Vancouver

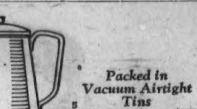

Plans are reported to be on foot among sheep raisers to establish in Vancouver a wool grading centre similar to that functioning in Trenton, Ontario, where at present most of the wool business of Canada is conducted. An authority states this would probably have the result of increasing the returns to the producer from 25 to 50 per cent.

THERE is nothing that has ever taken Canada's place as an antidote for pain. It is safe, or physician wouldn't use it, and endorse its use by others. Sure, or several million users would have turned to something else. But get the real Aspirin (at any drugstore) with Bayer on the box, and the word genuine printed in red:

Would Solve Anastasia Puzzle

Noted Historian Believes He Has Solution Of Controversy

Dr. Edward A. Walsh, S.J., vice-president of Georgetown University and a noted historian, believes he has in his possession a documentary solution to the Grand Duchess Anastasia controversy.

Whether it will uphold the woman now in the United States, under the protection of William B. Leeds, Jr., and known as Madame Tchalovsky, as a true daughter of the late Czar Nicholas of Russia, or brand her as an impostor, Dr. Walsh will not speculate.

He is certain the mass of documents and records which he recently brought to this country from Europe, will settle, at least in his own mind—whether or not the Grand Duchess escaped the massacre of the Imperial Russian family 10 years ago.

For the past seven years, the Jesuit priest has been conducting a historian's investigation into the facts surrounding the deaths of Czar Nicholas and his immediate family. His studies have carried him to Russia, Belgium, France, Austria, Switzerland, England and Italy.

Teeth and Health

Issued by The Canadian Dental Hygiene Council and Published by The Saskatchewan Dental Society

THE INCISORS

You are very particular to keep these eight front teeth (four upper and four lower), white and sound, so their function, then to you, would seem largely esthetical.

But you have another use from which they take their name—that is—to incise, or cut.

In your child you have seen them erupt with three distinct tips or tubercles, which by and by have worn down to leave a straight cutting edge.

This nothing is a purely normal development, being due to the calcification of the enamel covering from three separate centres. Now, you have noticed too, with perhaps no little concern, that upon eruption, the two upper front teeth (central incisors) seemed quite out of proportion to the size of the face, giving them an ungainly appearance.

But you must remember this—that while the face will grow larger, the teeth will not increase in size—so Nature has planned with foresight as you might have guessed.

Now try this; consult a mirror, and note the shape of your face. To which of the three types does it incline, tapering, oval or square? Then study the form of your upper central incisor—imagine it inverted, and observe that it conforms to the shape of your face. Nature is very attentive to details, ever striving for harmony.

Remember then, that you must give redoubled zeal to the care of these incisors, which are not merely useful, but are also an asset to your appearance, if rightly cared for.

The Columbia Ice Field

Now Included In Extension Made To Jasper National Park

The extension of 980 square miles made to Jasper National Park, Alberta, in 1927, brought the Columbian icefield within national park boundaries. This giant icefield, one hundred and twenty-five miles in extent, which is the mother of more than a score of glaciers, is surrounded by a galaxy of giant peaks and represents the very climax of the scenic and alpine features of the Rockies.

Demand For Irrigated Land

Evidence of the demand for irrigated land in Southern Alberta is the fact that the Canadian Land and Irrigation Company and it necessary to open up another unit of the Vauxhall project to meet the demand, a step it was not planned to take until 1930.

Minard's Liniment—the Universal remedy.

Little Helps For This Week

"But let us, who are of the day, be sober, putting on faith and love; and for an helmet, the hope of salvation."—1 Thessalonians v. 8.

I wake this morn, and all my life is free, my mine to live.

The future with sweet promise rife, And crowns of joy to give.

New words to speak, new thoughts to hear.

New love to give and take; Perchance new burdens I may bear For love's own sweet sake.

Every day that is born into the world comes like a burst of music, and rings itself all the day through; and thou shalt make of it a dance, a dirge, or a life march as thou wilt.

—Thomas Carlyle.

SUMMER COMPLAINTS

KILL LITTLE ONES

At the first sign of illness during the hot weather give the little one Baby's Own Tablets or in a few hours he may be beyond aid. These Tablets will prevent summer complaint if given occasionally to the well child, and will promptly relieve these troubles, if they come on suddenly. Baby's Own Tablets should always be kept in every home where there are young children. There is no other medicine so good and the mother has the guarantee that they are absolutely safe. They are sold by all druggists or will be mailed on receipt of price, 25 cents per box, by The Dr. Williams' Medicine Co., Brockville, Ont. A little booklet "Care of the Baby in Health and Sickness," will be sent free to any mother on request.

How Fast a Bee Flies

An experiment was once made to see how fast a bee can fly. The bee was attached to the roof of a train, which attained a speed of 30 miles an hour before the bee was left behind.

FIRESTONE WICK TEST

The jar at left is filled with Gum-Dipping solution. The other jar is empty at first. One end of the wick—made of cords used in Firestone tires—is placed in the solution, the other in the empty jar. Solution penetrates entire length of the cord wick showing that Gum-Dipping saturates the cords.

This exclusive Firestone process insulates every fibre with rubber, reduces internal friction and gives thousands of extra miles. Firestone tires cost no more than ordinary tires. Your local Firestone Dealer will gladly serve you, and save you money.

Three Attractive Features

The annual riding and camping expedition of the Trail Riders of the Canadian Rockies has many attractive features, but at the top of the list were undoubtedly the three charming maidens photographed above who took part in a 250 mile ride, joining up with the main group that visited the Lake of the Hanging Glacier. They are Kitty Miskay, Betty McCullough and Betty Hall, all of Philadelphia.

Death to the Weeds!

Mr R S Peters, the well-known authority on noxious weeds, was a visitor at The Sun office on Saturday.

Mr Peters is the gentleman who, with the aid of the various weed inspectors, waged a very vigorous campaign last year in the Edmonton District, of which Stony Plain forms a part. His visit was to see if any improvement was noticeable on the local farms, following last season's efforts.

Mr Peters is inclined to believe that, under the present system, no permanent good is being accomplished, and suggests that the Provincial Dept. of Agriculture should concentrate its efforts by spending in one season an amount equivalent to three times the present yearly appropriation for the eradication of the weed pest, and launch a big weed clean-up campaign.

It is a well-known fact that the M. D. Weed inspectors have too much territory to cover. This, with the short season and poor roads, is a big handicap for even the capable weed inspectors which the Inga and Spruce Grove M.D.'s are fortunate to have.

School Notes.

Mr D Moyer has secured the position on the local school staff vacated by Mr Wilcox.

The following students of the local school intend to attend Normal this year—the Misses Viola Manarey and Catherine Alt, Mr G Willie.

Some of the rural schools hereabouts open for the Fall session Monday, August 27. The school in Stony will open Tues. Aug. 28.

If your eyes bother you, or you suffer from headaches, why not have your eyes attended to by an expert? M M Mecklenburg, eye specialist, 10159 101st St., Edmonton.

Monday Evening's Lecture

The lecture given Monday evening by Rev G W Slater proved to be very interesting and instructive. The subject was "The Advancement of the American Negro." The speaker proved he had a very intimate knowledge of the subject, and advanced how the Negro had advanced decade after decade since his emancipation some sixty years ago. The program given by Mr Slater's choir was a real musical treat, and appeared to be appreciated by those present.

Spruce Grove News

Miss Coffey is the new teacher at St John School, in place of Miss Florence Pinchbeck, who is now on the teaching staff at Jasper.

There was a good attendance at the meeting held here Friday evening in the interests of the Wheat Pool. The several addresses were given close attention. The subject of the Dairy Pool was also touched on. Another meeting will be held at the Grove next Saturday evening, Aug. 25th. Several of the officials from Edmonton will be present on this occasion.

The Money was Recovered.

When Fritz Morgenstern, an immigrant, arrived in the Golden Spike district in the spring, to work, he handed a valuable packet to his employer for safe-keeping. On leaving his employ the other week, he was handed back the package. On arriving in the city and counting the money he found there was a shortage of \$100. Corporal Moses investigated, the money was recovered and given to Fritz. It seem the kinder at the house had been playing with the package and the money had slipped out.

Jetzt sagst du einen!

Cups for the Shooters

Ash Bros., the Edmonton jewelers, have presented a handsome cup, to be contested for by members of Stony Plain rifle club. The cup goes each week to the party making the high score at the weekly shoot. Last week the high score was 33, and four of the shooters tied at this. On the shoot-off Sites Sr. won. At the end of the season a watch will be presented to the holder of the high scores for the season.

The Northwest Brewing Co's Cup is now in possession of Mr Lawrence Zilliox, he having made the last high score in the contest for the Cup.

Dealing With Confidence!

Farmers, both shareholders and non-shareholders, deal with confidence with this farmers' company.

They know the experience, resources, organization and equipment enable this Farmers' Company to give to farmers the best of service and equipment.
